May 2020

[Windows 10 version 2004](#) will be released to the public at the end of May.

The [list of new features in Win10 version 2004](#) seems even less compelling than any Windows version upgrade, ever. The [second feature update of 2020](#), expected around October, will likely be a minor cumulative update and not a full feature update.

There is no rush to install the new update - [Windows 10 version 1809 \(Nov 2018\) will now get monthly security updates until November 2020](#). Updates were originally due to end in May 2020.

## Technology and COVID-19
